As much research show, education is undergoing constant change under the effects of globalisation and bring rapid developments in technology and communication within learning systems across the world. Ideas, values and knowledge, as well as changing roles of students and teachers within education, are themes we expect to discuss and plan for further explorations and seminars.

The Nordic Summer University (NSU) is a Nordic network for research and interdisciplinary studies.

NSU is a nomadic, academic institution, which organises workshop-seminars across disciplinary and national borders. Since it was established in 1950, Nordic Summer University has organised forums for cultural and intellectual debate in the Nordic and Baltic region, involving students, academics, politicians, and intellectuals from this region and beyond.

Decisions about the content and the organisational form of the NSU lay with its participants. The backbone of the activities in the NSU consists of its thematic study circles. In the study circles researchers, students and professionals from different backgrounds collaborate in scholarly investigations distributed regularly in summer and winter symposia during a three-year period.
